Gamepad Controls

Supported Controllers

Lost can be played with an Xbox controller (Xbox 360, Xbox One, Xbox Series X|S, or any other XInput controller), connected by USB or Bluetooth. You can use the keyboard and the gamepad at the same time. Button names below follow the Xbox layout.

Controls

Action	Gamepad	Keyboard
Movement		
Move left / right	**Left stick / D-pad** ← →	← →
Jump, swim up	**Left stick** ↑ **/ D-pad** ↑	↑
Press down (drop fast as a triangle, swim down)	**Left stick** ↓ **/ D-pad** ↓	↓
Change Shape		
Circle	A	Z
Triangle (only while jumping or swimming)	B	X
Square	X	C
Special shape (varies by stage)	Y	V
Other		
Restart from the last save point	**View (Back) button**	K
Press to restart from the last save point; hold for more than 1 second to quit the game	**Menu (Start) button**	Esc

The left stick registers input once it is tilted at least halfway.

Using Other Controllers

PlayStation and other non-Xbox controllers work with the same layout when you launch the game from Steam with Steam Input enabled. Buttons map by position to the Xbox layout (for example, on a PlayStation controller: ✕ = A, ○ = B, □ = X, △ = Y).

Troubleshooting

- If the controller does not respond, check its connection. For Bluetooth controllers, try pairing again or connecting with a USB cable.
