LOST

Gamepad Controls

Supported Controllers

Lost supports Xbox controllers (Xbox 360, Xbox One, Xbox Series X|S, or any other XInput controller), PlayStation controllers (DualShock 4, DualSense) and the Nintendo Switch Pro Controller, connected by USB or Bluetooth. Any controller that Steam Input supports, including the Steam Deck, also works when you launch the game from Steam with Steam Input enabled. You can use the keyboard and the gamepad at the same time. Button names below follow the Xbox layout.

Controls

Action	Gamepad	Keyboard
Movement		
Move left / right	**Left stick / D-pad** ← →	← →
Jump, swim up	**Left stick** ↑ **/ D-pad** ↑	↑
Press down (drop fast as a triangle, swim down)	**Left stick** ↓ **/ D-pad** ↓	↓
Change Shape		
Circle	A	Z
Triangle (only while jumping or swimming)	B	X
Square	X	C
Special shape (varies by stage)	Y	V
Other		
Restart from the last save point	**View or Menu button**	K or Esc
Quit the game: keep holding for more than 1 second after the restart screen appears	**Hold View button**	Hold Esc

The left stick registers input once it is tilted at least halfway. Holding the Menu button does not quit the game.

Other Controllers

Xbox button	A	B	X	Y	View	Menu
Steam Deck	A	B	X	Y	View	Menu
PlayStation 4	✕	○	□	△	Share	Options
PlayStation 5	✕	○	□	△	Create	Options
Switch Pro	B	A	Y	X	− (Minus)	+ (Plus)

Face buttons map by position, so the bottom face button always changes you into a circle on every controller. If Steam Input's Nintendo button layout option is on, the Switch Pro buttons follow their printed letters instead.

Notes

If your controller is not listed above, launch the game from Steam with Steam Input enabled.
